**PUBLIC AUCTION OF ATLANTIC COFFEE SOLUTIONS**

*3-Day Auction of Massive Coffee Plant in Houston, Texas*

**[HOUSTON, TEXAS, January 29, 2019]** - Rabin Worldwide and Liquidity Services will conduct a public auction of the former Atlantic Coffee Solutions plant in Houston, Texas on February 12, 13 and 14, 2019. With a 100 plus year history, and over one million square feet under roof, the plant is considered by most the world's largest coffee manufacturing facility for whole bean roasting and packaging, as well as large scale instant decaffeinated production.

Referring to Atlantic Coffee Solutions as a single plant is a bit of a misnomer, as it's an integration of multiple plants capable of operating independently or in tandem. Within the towering structure, producers and curiosity seekers will find a maze of production and packaging floors, packed with coffee roasters, grinders, percolating vessels, twenty retail packaging lines, plus a 16-story decaffeination tower previously producing 88-million pounds of instant coffee products per year.

Situated approximately 8 minutes east of downtown Houston, at first glance one might compare the plant to a massive power generation facility with flashing red lights at on the tallest peaks to warn low flying aircraft. Those familiar with it may consider it an industrial landmark in Houston, and soon it will be emptied of its contents and the building will be demolished.

According to Richard Reese, president of Rabin Worldwide, "I've seen hundreds of industrial plants in my lifetime, but few like Atlantic Coffee. Being landlocked by railways on both sides of the factory, the plant seemed to grow by going up, not out. In my entire career, I can't recall seeing 200,000-pound capacity raw product storage silos suspended six stories above a factory. One of my initial thoughts when approaching the plant for the first time was how did they get permission to build and expand such a massive structure?"

In addition to the production and packaging machinery, hundreds of general plants items are available for bidding, including machine tools, laboratories, and office furnishings. In a 100-year old factory, there's always the possibility of finding some forgotten treasures or pieces of history. Among the equipment and a machinery filling the one million square foot plant, a few antique coffee roasters and grinders await. The auction will be a 3-day event on the premises of the facility and simulcast online, February 12-14, 2019. The entire list of over 2000 lots is available now for viewing at [rabin.com](http://rabin.com).

Rabin Worldwide is an international auction and valuation specialist of industrial plants and equipment. With over 50 years of experience in every sector of the industrial community, Rabin's signature business is providing a host of solutions including auctions, liquidations, turn-key sales, real estate acquisition and more.
